# hold tight to your jet sled

DAZZLING 3-D COLOR GRAPHICS.

A SIZZLING PACE.

AND A QUEST THAT WILL TAKE YOU
TO A REMOTE AND WATERY WORLD.

## A STIRRING, NEW ADVENTURE BY THE AUTHOR OF CHOPLIFTER!

It's **Airheart**,™ the first double hi-res, arcade-style game for the Apple II. Designed by Dan Gorlin, creator of the best-selling Choplifter, Airheart is the story of a once-powerful civilization now laid to waste.

The story began with a king caught in a war he could not win. Using the last of his power, he put his infant son in suspended animation – safe within a crystal dome – and hid him in a vast ocean.

## HIGH SPEED RESCUE AT SEA

Now you need to rescue the sleeping prince from his hiding place and restore him to his throne. It's not going to be easy. The pace is red hot as you maneuver your weathered but high-speed jet sled over the ocean, dodging and dueling your way past the robot guardians of the prince.

## NO TIME TO LET YOUR GUARD DOWN

You'll have to prove yourself . . . three times. Only then will you win the right to fight the final, furious battle.

**Airheart** features:

- 16-color, double hi-res graphics
- Fast, 3-D animation with ocean waves so realistic you're liable to lose your land legs
- Challenging play – this is one game you won't easily master
- Realistic sense of flight
