Softworks

# geoPublish™ General Quick Reference

Press and hold the **Option** key, then press one of the highlighted keys shown in the diagram to select a function. If your keyboard does not have an **Option** key, use the **⌘** key instead.

Press the arrow keys alone to move the pointer in small increments. Press **Return** alone to simulate a click of the input device button.

**Note:** The Editor is only available in the full-sized version of geoPublish and is only accessible in Page Layout mode. The zoom feature is not accessible in Page Layout mode.
