Please note that most of our quoted prices now include either VAT, (UK sales tax) or VAT & UK postage: our literature should indicate what charges are included.

For export deliveries to any country outside the UK, please use the following formulae to calculate nett export prices:-

Prices including VAT only

divide the price including VAT by 1.15 to find the nett export price.

Prices including VAT AND UK postage

deduct £2.00, then divide the remainder by 1.15 to find the nett export price.

Because of the diverse nature of overseas postal charges and the huge variation in shipping weights of our large range of products, we are unable to provide a 'ready-reckoner' of shipping charges.

Please either fax, telex, write, or telephone us for an instant quote on shipping to any destination. Note that we are able to ship either by surface or air parcel postage, or by International Datapost, (the latter taking approximately 2-3 days worldwide from despatch). Please indicate the preferred method of despatch.

For purchasers with Access/Mastercard/Eurocard we can simply add the shipping cost to the credit card charge, so please make sure to show how you want the goods sent.

If you are visiting the UK, we can despatch goods to UK addresses or you may collect from Appledore. In either case, we are required by law to charge 15% UK sales tax (VAT) unless you are able to provide us such evidence of your return flight/sailing to your home

country. In such cases, we require the name of the Airline/Shipping Line, the name of the ship or flight no., date of departure, and ticket no. Payment in these cases may either be by credit card, sterling cash (or US dollars at our discretion), or by your paying sterling cash on delivery at your nominated UK shipping address.

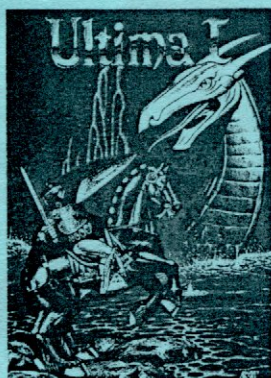

In all cases for non-domestic sales, we must have payment in advance by credit card, sterling cash (or US dollars at our discretion), by sterling bank draft/cheque drawn on a UK bank with a UK address, or by EuroCheque. Any other types of payment may be subject to additional charges. Payments made by EuroCheque for goods in excess of £100.00 must be made by multiple Eurocheques, each not exceeding £100.00.

Juggernaut Fighting Machine

OGRE

OGRE by Steve Meuse

OGRE

Ogre is a strategy game set in the scarred nuclear battlefields of the 21st century. Amongst the conventional nuclear-armed tanks, speed vehicles, howitzers and infantry is the Ogre – the most fearsome war machine ever created.

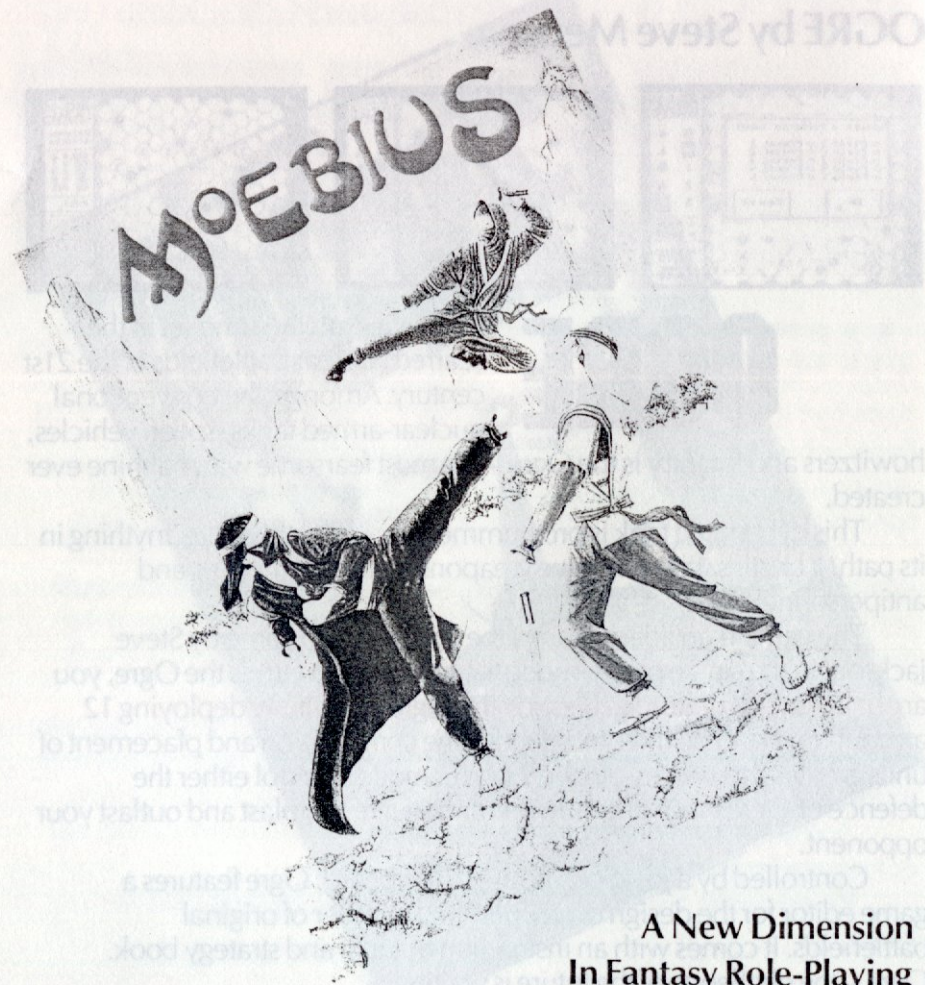

This cybernetic tank is programmed to coldly obliterate anything in its path. It bristles with offensive weapons including missiles and antipersonnel guns.

The game is an adaptation of the classic board game by Steve Jackson. In the single player mode the computer controls the Ogre, you are battalion commander. Destroy the Ogre by skilfully deploying 12 armour units and 20 infantry squads. The composition and placement of units is critical to success. In the 2 player mode, control either the defence or Ogre. Your goal is to outmanoeuvre, outblast and outlast your opponent.

Controlled by a joystick, mouse or keyboard, OGRE features a game editor for the design of an unlimited number of original battlefields. It comes with an instruction manual and strategy book. OGRE – the challenge of the future is waiting.

- Various Ogre skill levels
- Menu driven for ease of use
