Brøderbund Software ®

Now here's some magic! Unabashed doodling and your personal computer come together in a software program that's pure fun! Brøderbund Software introduces *FANTAVISION*.

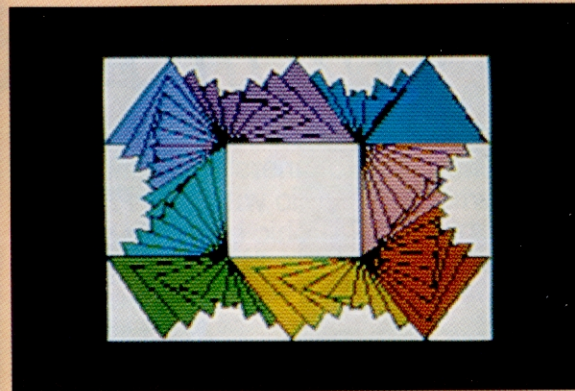

FANTAVISION™
by Scott Anderson

The fun begins as you plot the points of your creations, fill them with vivid colors and then watch them as they unfold, turn, spin, bounce…virtually come alive on the computer screen.

FANTAVISION technology allows you to draw stick figures, solid shapes, lines, faces, bodies, the moon and the stars using a mouse, graphics tablet, joystick or KoalaPad™.

The computer will make up to sixty-four drawings for every one you draw, automatically producing cell animation-style movement and special effects never before possible in a microcomputer software program.

Now virtually anyone— artists and non-artists alike, children, teachers, homemakers and executives—can have unlimited fun creating special effects, cartoons, mini-movies and fabulous doodles with the extra element of magic called *FANTAVISION*.
