New #1

Performer of the Month: **Jack Nicklaus' Unlimited Golf & Course Design**

"Building a golf course is a total expression of all the golf I've played and the courses I've seen all around the world. Jack Nicklaus' Unlimited Golf & Course Design lets you share some of the thrill I get as a player and designer. It gives you the ability to play state-of-the-art computer golf on any number of courses that you can easily create."

"Like me, I think you'll find that this simulation captures the complete golf experience. From sculpting landscape to playing magnificent, finished courses - this is truly golf from the ground up."

Jack Nicklaus

ACCOLADE

Coming Soon: **Red Baron**

This incredibly realistic flight simulator recreates the excitement, look and experience of aerial flight in the war that launched aerial combat. Accurately detailed in every aspect - from the Ace Expert System, which models the combat characteristics of the actual Aces of the time, to the visual stunning 256 color VGA digitized 3-D graphics - Red Baron is a monumental step forward in flight simulation. Designed for simulation fans and novices alike, Red Baron uses a straight forward realistic menu which gives the player complete control over game play complexity, difficulty, and realism. Fly on either side of the war as a British pilot in the Royal Flying Corps or as a German pilot in the German Army Air Service.

Captures the thrill of W.W.I.

The Norton Utilities Version 5.0

Norton Utilities® Version 5.0 offers sophisticated tools for protecting data and enhancing PC performance, in a package that's simple enough for a novice to use. With these tools installed, it's easy to keep a computer running at peak efficiency, and even the most difficult disk problems aren't a problem. If you depend on your computer, depend on Norton Utilities 5.0 to maximize your investment in hardware, software and data.

The *Calibrate™* program tests and adjusts the interleave of hard disks, optimizing their read/write speed and dramatically improving performance.

Speed disk™, enhanced for this version, continues to be the world's most effective disk tuning device.

Disk Monitor™ protects data from bugs in applications, and intercepts viruses before they can damage files.

File Save makes resurrecting erased files easier, by redirecting DOS away from important erased files when it is overwriting.

Protection from data loss is also provided by the legendary *UnErase®*, which lets users search for and retrieve data with just a few keystrokes. Accidentally formatted hard disks can also be recovered, using the powerful *UnFormat*.

System Requirements: DOS 2.0 or higher, 512K memory, IBMPCXT,AT,PS/2 and 100% compatibles, Mouse support, Hard disk recommended.

Clue Quest:

• **Bonk's Adventure (TurboGrafx-16)**

At the very beginning of level 1-1, go all the way to the very left edge of the screen. Have Bonk jump and land on his head. A small flower appears. Head butt it. A flower will fall from the sky. Catch it. When it lands, a large flower will appear. Jump on it for a 1-Up.

• **Ironsword (Nintendo)**

Here's a great code for Ironsword. Begin with a diamond shield, diamond helmet, and two extra lives: NTTMNWLPPBDZ !

• **Truxton (Genesis)**

After releasing your ordinance when the screen has turned white (indicating an explosion), press START to pause. If you wait about 20 seconds then take the game off pause, you'll find the boss has been destroyed.

Hayes Personal Modem 2400plus

Hayes has added a new modem to their line of high quality modems, the Personal Modem 2400plus.

The Personal Modem 2400plus fits in the palm of your hand. It works with MS-DOS compatible computers and with Macintosh computers. All necessary adapter cables come with the modem. You simply plug the modem directly into a wall outlet, like an AC adapter. The connectors are integrated into the modem. The serial cable is connected to the RS232 port or to the Macintosh serial port of the computer, and the other cable connects to a modular phone jack.

The Personal Modem 2400plus uses the "AT" command set, like all Hayes modems.

There are only two lights on the Personal Modem 2400plus. One of them is the power light, the second tells you if you are communicating.

The volume level and all other modem operations are controlled through software. There are no switches or jumpers to be set.

This modem comes in two packages: one for the MS-DOS computers and one for the Macintosh computer line.

The Personal Modem 2400plus is a good entry-level product for exploring a world of information through high-speed computer communications.
