

More features than Commodore 64!

And more powerful than an Apple IIe, for a fraction of the cost. Dick Smith Electronics presents The CAT.

That means that you can use thousands of programs designed to run on Apple IIe – without paying the Apple IIe price! Programs for fun, for learning and for business.

With its very large internal ROM memory – twice the size of the Apple – and a larger, easier-to-use keyboard (81 keys compared to the Apple IIe's 63 keys!), high resolution graphics, 8 colours, 6502A second generation processor, it has the features you need – without paying one cent extra for 'standard'

features others charge you a fortune for!

The bottom line is always the price! And the CAT wins paws down. A fully expanded Apple IIe cost over \$2,200 while The CAT, similarly optioned sells for less than \$1,500. Affording the best computer has become a whole lot easier. . . with The CAT, from Dick Smith Electronics. Below is a small sampling of the great range of software available for the CAT, obtainable from your nearest Dick Smith Electronics' Store.

Visicalc II. . . The first and the best spreadsheet. **\$428**

Sandy Word Processor. . . This program is setting a new standard for Word Processing on Micro's. **\$189**

PFS File. . . One of the most popular and powerful filer/database programs available. **\$175**
