ANNOUNCING

UPDATES / SUMMER SALE / VIDEOTAPES

You've probably heard that software sales for the Apple II line are way down. After 10 years in the Apple II software business, I'm beginning to think it may be time to switch to something else. However, I'm not giving up without a fight!

Diversi-Copy version 4.0 is now shipping. We've added a whole new file for the IIgs which can be added to any ProDOS volume. With it, you can install Diversi-Copy into the desk accessory menu automatically on boot. This means that you can now copy 3.5 disks any time, and then return back to your program. No more cold re-booting after copying disks!

Diversi-Cache version 3.0 now works with GS/OS up to version 5.0.2. Diversi-Cache will greatly speed up disk I/O for ProDOS8 programs launched from GS/OS, including Appleworks.

Diversi-Key version 1.1c now works with Appleworks version 3.0 or less.

Diversi-Tune version 1.1 now works with the Audio Animator MIDI interface. It also allows you to copy tracks, and change the colors of all the displays. When you order version 1.1 for \$20, you'll also get a free update when I release version 2.0 this fall (version 2.0 will have new instruments and other significant improvements).

I've had to raise the update fees to increase revenues because of declining new program sales. I've also put all the Diversi-Tune products on sale, at the lowest prices they'll ever be. If you're planning to get any of the new song disks, now's the time!

Finally, we've added Diversi-Tune videotapes to our catalog. If you have friends without computers who might be interested, please let them know about the tapes. New income from tape sales will allow me to keep programming the Apple II. Thanks for your support.

Bill Basham
