Epson ESC/P2 was originally introduced in mid-1991 as the second generation printer control language for Epson 24-pin printers. Compared to the original Epson ESC/P standard, with which it is backward compatible, it adds support for in-built scalable fonts

It brought the benefits of scalable font technology to text-based environments like MS-DOS, as they were then being popularized in Windows & Macintosh (TrueType). Epson released ESC/P2 drivers (MS-DOS) for Word 5.0-6.0, WordStar 6.0, WordPerfect, Lotus 1-2-3...

In-built scalable fonts are only supported by applications with an ESC/P2 driver. Generic Epson drivers (ESC/P) can only use in-built bitmap fonts. Printer fonts aren't relevant to Windows which prints via bit graphics mode (font generation being handled by the computer).

The Oki Microline 791 24-pin dot matrix printer features Epson LQ emulation with ESC/P2 compatibility. Officially, Oki Microline 791 has 3 scalable LQ fonts (Courier, Roman, Swiss @ 11pt-64pt) vs Epson LQ-100 (Roman, Sans Serif 8-32pt)

These samples were created using Microsoft Word 5.0 (MS-DOS) with Epson ESC/P2 driver (configured LQ-100). The Oki has both parallel & USB interfaces but I'm using USB on Windows. To have it emulate a parallel printer on LPT1: first share it as a network printer, then issue this command:

NET USE LPT1: \computername\printersharename /PERSISTENT:YES

This makes the printer accessible on LPT1: even if the PC lacks a physical parallel port

Then modify the DOSBox SVN Daum config file as follows:- parallel1=file dev:lpt1

This allows any MS-DOS program running in DOSBox SVN Daum to print directly to LPT1:

If using a real parallel port, the config line should read:parallel1=reallpt

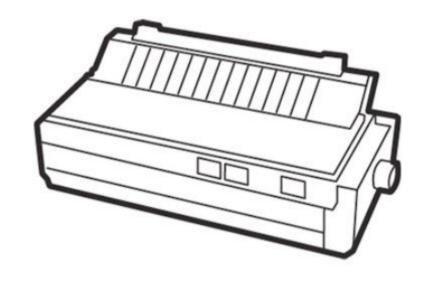

NB: Regular DOSBox doesn't cater for printing. However printing works beautifully on patched DOSBox like the SVN Daum version I'm using

```
DOSBox SVN-Daum, CPU speed: 3000 cycles, Frameskip 0, WORD
    Cpu Video Sound Dos Capture

even envelopes.

and you're quickly up to 200.

When fully loaded, these printers put as many as five types

of paper at your fingertips. Everything from letterhead to

continuous-form checks, four-part forms, tractor-feed paper,

All our printers can automatically handle 50 sheets using

Then there's Epson SmartPark™ paper handling. At the press

our optional single-sheet feeder. Add our high-capacity feeder

Punny how history has a way of repeating itself. Year after year—actually for the past 25—Epson® has been the leader in dot matrix printing technology.

Introducing six reasons why that leadership is sure to continue: the letter-quality Epson LQ-570, LQ-870, LQ-1070, LQ-1170, ActionPrinter™ 5000 and ActionPrinter 5500.

More Paths To Success.

For sheer paper handling flexibility,

of a button and flick of a lever, you can easily switch between two different kinds of paper. In effect, parking one and moving on to another without having to stop to change paper.

handles quite as well as these.

Case in point: the versatile

LQ-870 and wide-carriage LQ-1170.

With five different paper paths to draw from at any moment, an Epson LQ printer is as versatile as it is dependable.

have to put much time, thought or effort into using them.

you'll get superior output quality and faster throughput speeds.

But don't just

take our word for

it. Take a look at

the quality of our

graphics instead.

Scale New Heights.

Each new Epson printer comes with a new industry-setting standard—ESC/P2.™ This breakthrough printer control system brings scalable fonts to dot matrix printing.

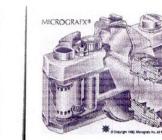

Simply put, type sizes are no longer as limited. So now you can do things with a 24-pin printer that before could only be done with a laser. And you don't have to give up one bit of paper handling flexibility to do it.

Graphically Superior.

What ESC/P2 does for type, it also does for graphics. Brilliantly.

It includes an enhanced Windows™ driver, exclusive to Epson.

When you print from any program running in Windows,

(Before

Epson's enhanced Windows driver improves not only the look of your text and graphics, but the speed at which they print.

SCALABLE FONTS

With a new Epson LQ printer, you can print a variety of type in a variety of sizes, up to 32 point.

Built For The Long Run.

Epson printers aren't only designed with more firsts, they're designed to last. Each is backed by

a generous 2-year limited warranty. As well as a helpful toll-free 800 number to provide you with dependable, expert assistance.

One more thing you can always depend on: Epson reliability.

It isn't a claim just any printer company can make. It's a quality—a character trait—our products have earned over time.

To see the latest printer innovations firsthand, visit your nearby Epson dealer, or call 800-289-3776. And see why, after more than 25 years, Epson is still the first name in dot matrix printing.

Whither Windows support?

<u>Version 1.3 of Microsoft Windows ESC/P2 driver ("EPSON.EXE")</u> - 1993 release - actually contains two distinct drivers for use with Windows 3.1 — *ESCP2E.DRV* and *ESCP2.DRV*ESCP2E.DRV supports in-built scalable fonts ("Roman Scalable" and "San Serif Scalable" as they appear in Windows font menu).

<u>Later version ESC/P2 drivers (ca. 2003)</u> are available from Epson's website — the one named "*Generic 24-Pin Printer Driver v1.1dE*" supports in-built printer fonts (with European symbols) on Windows 3.1/95/98/NT platforms.

Read Microsoft's revision history detailing the specific differences between the drivers.
