Text Scanning Software for the Apple II

by Alan Bird

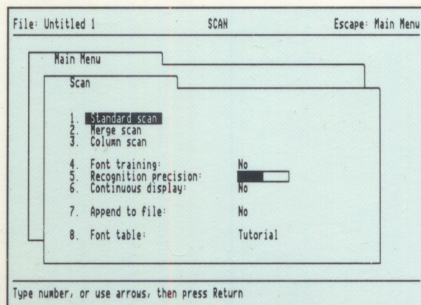

InWords™

Features

- ▶ **Fast and accurate character recognition**
InWords reads text at a rate of up to 3000 characters per minute with high accuracy.
- ▶ **Recognize any typeface**
InWords is capable of reading nearly all styles and sizes of type from 6 to 48 point. You can teach InWords to recognize new typefaces with our quick and easy training mode.
- ▶ **Reads full pages**
The "Merge scan" option allows you to scan pages that are wider than the scanner by scanning the left and right sides of the page. InWords automatically pieces these strips together into a full-page, ready to edit.
- ▶ **Creates files for popular applications**
Text scanned with InWords can be saved as AppleWorks® word processor files or as ASCII text files, that you can import into most word processor, data base, spreadsheet, desktop publishing and telecommunications programs.
- ▶ **Built-in text editor**
The InWords editor lets you review and modify the scanned text before saving it to a file.
- ▶ **Distinguishes text from graphics**
- ▶ **Isolates columns automatically**
- ▶ **Controls scanner directly**

InWords is a revolutionary new way to enter information into your computer. With InWords and a hand-held scanner, you can scan in virtually any printed information — just as if you typed it from the keyboard — only faster. Simply move the scanner over a document, capturing a graphic image of the page, then watch as InWords converts the text in the image into a file that you can use with your word processor, data base, spreadsheet or desktop publishing program. Ready to edit, analyze, calculate or print.

InWords provides a variety of scanning methods to accommodate all your text scanning needs.

TRAINABLE FOR YOUR NEEDS

InWords can read a variety of typefaces the first time you use it. However in today's world, text appears in many styles and sizes, so we've designed InWords to be flexible by giving it the ability to "learn" how to read new typefaces. Through a simple training process you can teach InWords to recognize just about any type of text.

JUST A SCAN AWAY

What do you need to enter into your computer? A report or legal contract? A lesson plan from a history book? A recipe from a magazine? An article from the newspaper? A catalog of product prices? All of these, and more, are just a scan away with InWords — the perfect solution for businesses, educators and home users who want to save time.

HARDWARE REQUIREMENTS

Apple IIGS® or enhanced Apple IIe with 512K, and Quickie™ or compatible hand-held scanner. Includes both 3.5" and 5.25" disks.

Apple, Apple IIGS and AppleWorks are registered trademarks of Apple Computer, Inc. Quickie is a trademark of Vitesse, Inc. InWords is a trademark of WestCode Software.

HOW FAST CAN YOU TYPE?

Thanks to InWords it really doesn't matter how fast (or slow) you type, because InWords can enter up to 500 words per minute. Why spend countless hours typing when InWords can do the work for you?
