

microbee

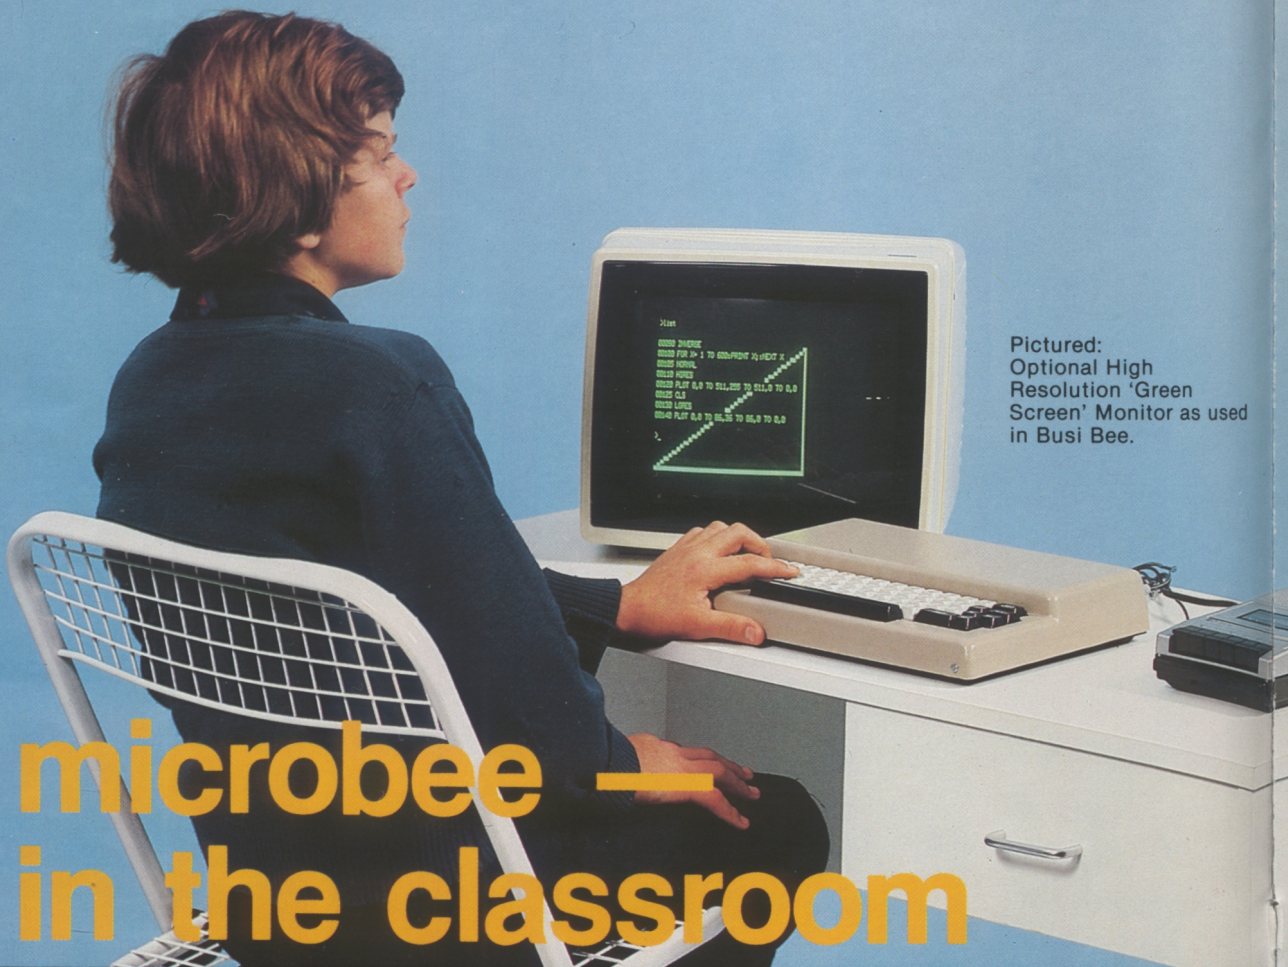

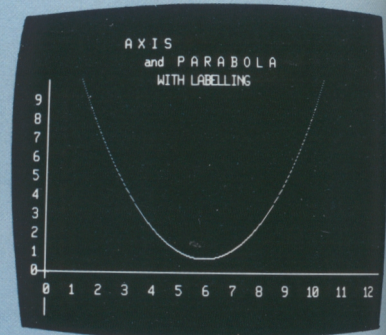

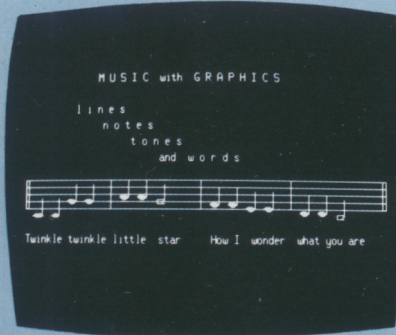

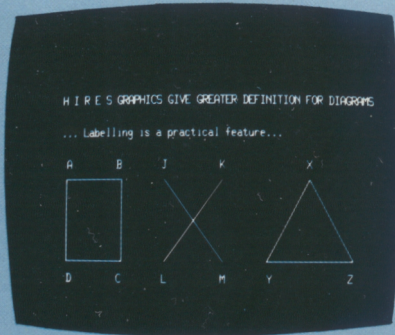

Australia's Own Education,
Personal and Business Computer.

Owen J. Hill, B.E., MBA,
Managing Director,
Applied Technology Pty. Ltd.

"We are at the dawn of the next industrial revolution. Just as the machine magnified man's muscle power, the microprocessor amplifies brain power to meet the challenge of the complex world of today. Can we afford to allow another generation to mature without the opportunity to harness this incredible breakthrough in technology?"

microbee — in the classroom

Education Authority Approved

Used by many Australian educational institutions and now approved by the N.S.W Department of Education as a recommended computer under contract, the MICROBEE is very effective in the classroom. Costing only a fraction of comparable computers, the MICROBEE is producing a whole new breed of educators who are using it to enhance the learning process for children of all ages. You can program the MICROBEE yourself or select from a rapidly expanding library of educational software.

Built in Features

With features such as built-in music generation, high and low resolution graphics, a very usable screen display of 16 lines each containing up to 64 characters (upper and lower case of course), the MICROBEE is ideal for virtually all educational software applications. When you also consider standard extras like continuous memory, built-in printer and input/output interfaces, self-testing BASIC in ROM, the MICROBEE is way ahead of other computers costing many times its price.

Classroom Networking

Now, at last, it is possible to connect a group of computers into a cost-effective classroom network of 5, 10 or even more machines that will greatly increase teacher effectiveness and motivate students at all levels. Now a class network can share expensive disk systems and printers and even interface with other computer systems.

The Ideal Teaching Aid

The MICROBEE will never replace the role of the teacher but it can greatly improve the effectiveness of the teaching process in many key areas. Indeed the MICROBEE is the ideal learning aid for schools, technical colleges and universities.

EDU BEE PAK; comprises MICROBEE 16K with TV monitor and tape recorder, EDPAK 1 Software and complete manuals.

microbee — in the home

The Fun Computer For The Whole Family

Your child can complete his homework with the MICROBEE. Then develop his programming skills or have a few friends around to enjoy playing games like MICROSPACE INVADERS, MASTERMIND or even CONCENTRATION. If she can get Johnny away from the MICROBEE, Mum can check the **home finances** or use the **computer diary**. Late at night Dad will get to use the MICROBEE to enjoy a game of **chess**.

An Investment In Your Family's Future

The MICROBEE is a very flexible computer designed to carry out a wide variety of tasks around the home. What's more it won't cost you an arm and a leg! Even more important, the MICROBEE is fully expandable so you are assured that your investment doesn't become obsolete overnight when you need to add peripherals such as **colour graphics, speech synthesis, communications and light pens**.

Your Creative Computer

Your MICROBEE may not wash the dishes or walk the dog yet. But who knows what Johnny and Dad might program during a wet weekend? Robots, communications terminals via the phone line, even a super special games machine are all possible . . . it just needs a little imagination!

The Powerful Home Computer

Take the powerful MICROBEE 32K and add the optional EDITOR/ASSEMBLER ROM PAK. You now have the ideal home computer, great for playing games, writing your own programmes in **basic or assembly language**, carrying out fun experiments as you learn computer fundamentals.

HOME BEE PAK; A complete system ready to program including MICROBEE 32K, TV Monitor, Cassette Recorder, EDITOR/ASSEMBLER PAK, GAMES PAK 1, full documentation and instructions for \$699.

\$699 **SAVE \$50**

Or Separately; MICROBEE 32K \$499; TV MONITOR \$139; TAPE RECORDER \$39; EDITOR/ASSEMBLER \$49.50; MICROSPACE INVADERS \$14.75; CHESS AND GAMES TAPE \$7.95; TOTAL \$749.20
Additional Manuals \$7.95

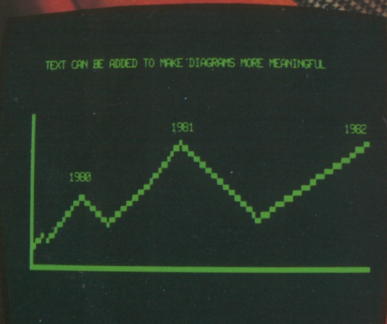

Prices are Recommended Retail and Include Sales Tax.

Word Processing, Graphics and much much more!

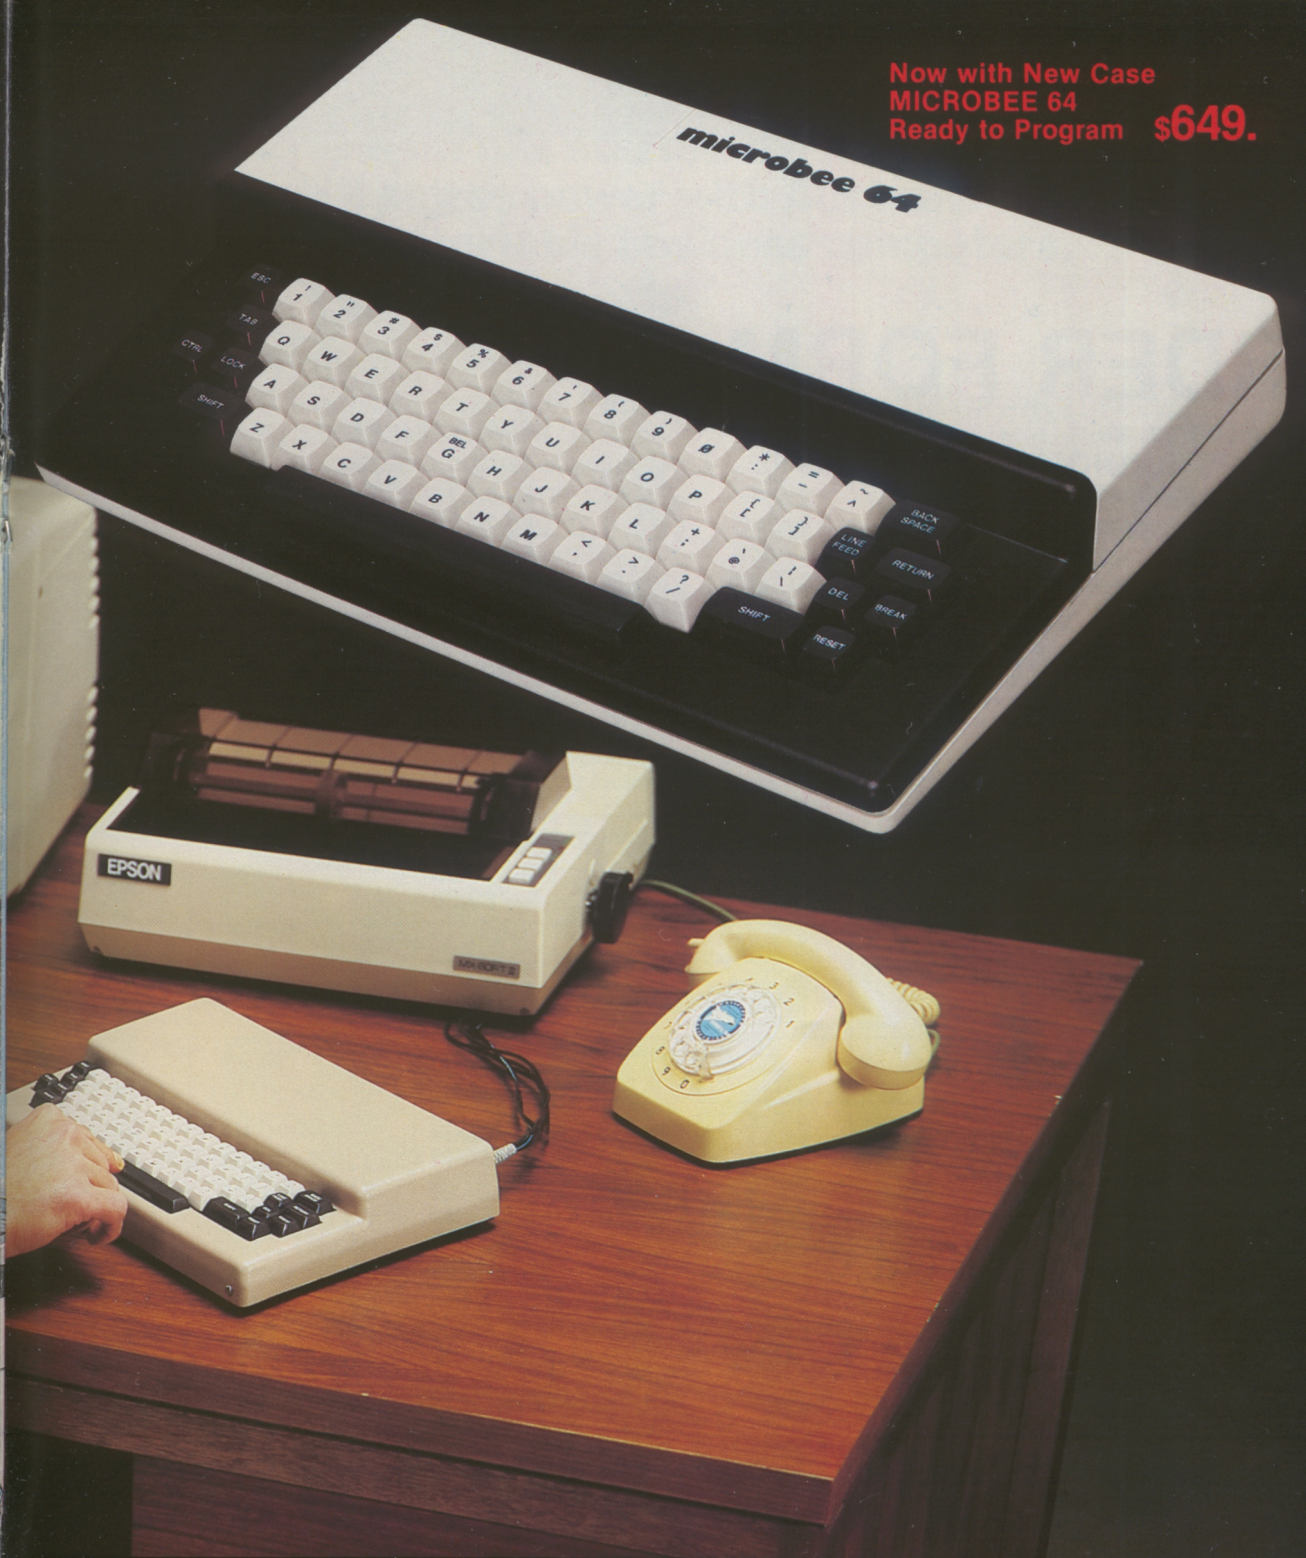

As Dad will probably soon realise, the MICROBEE is a whizz as a small business computer as well. Used at the home or office, it can display information using effective graphics, calculate complex equations, keep track of inventory and accounts receivable and even serve as a word processor. When used with disk drives operating under CP/M 2.2, The MICROBEE will run the same world class software as computers from IBM, Apple, Hewlett Packard and DEC. You can be

reassured that MICROBEE is quite a business proposition.

MICROBEE— An Australian Success Story

The incredible MICROBEE is destined to become one of the most popular computers in Australia. Almost 2,000 have been sold since it was introduced in March 1982 and 10,000 have been scheduled for production through our own facilities at Gosford N.S.W. Now is **your** chance to share in a real Australian success story!
